Host: MoCap Chapter Board Members

REGISTRATION and RSVP Information

This month 's meeting is free of charge

Title: "How to Turn this Setback into an Incredible Comeback"

by Dr Willie Jolley

Core Competency: Leadership

We are in the midst of a series of major setbacks and crisis situations, however, this will not be the last setback, nor last crisis you will experience. Some will only survive these challenging times and some will thrive. In this program, Dr. Willie Jolley will share strategies and principles to help you not only survive but thrive!

Those who win in these tough times think differently than who don't. They possess certain qualities that separate them from the masses, including resiliency, creativity, resourcefulness, a strong positive mental attitude, commitment and a hunger for greatness.

Those who win also understand that failure is part of the success process, and the ability to embrace it and grow from it is a sign of greatness and is critical to your future successes. Using real-life stories from his own life, Willie Jolley shares success principles that can make the difference between just surviving this crisis time and thriving.

You will learn:

- To develop the mindset that winners use to overcome tough times
- To implement step-by-step strategies you can immediately use to turn your setbacks into comebacks
- To prepare your action plan to bulletproof your future!
